

KILLDEER PUBLIC SCHOOL

2020-2021 HEALTH & SAFETY SCHOOL REOPENING GUIDELINES

August 12, 2020

Killdeer School Families,

It has been a challenge for our entire community since March, but we hope you have found ways to cope and embrace this new normal. Thank you to the students, staff, parents, and community members who have helped us succeed in these difficult times. The 2019-2020 school year was challenging but we are proud of our students and their educational accomplishments.

The challenge now is planning for what school will look like during the 2020-2021 school year. This is a daunting task as we all realize how the impact and response to COVID-19 has changed rapidly over the past four months. This plan will try to address these challenges, while providing a flexible framework to guide our response over the next school year.

Currently, Dunn County and the Killdeer School District is classified by ND CDC and the SW Health District Unit as Low Risk/New Normal (Code Green). Having a “Code Green” status; state officials encourage schools to open and instruct students using the face to face instructional model. Not only for academics, but also for social and emotional purposes we are compelled to strive to return to an in-person model. Yet, we cannot disregard that the health and safety concerns associated with the virus remain. The district must consider all practical steps to keep our school from contributing to virus spread in our community.

This plan presents many hours of critical thinking, research, modeling, and work by our educators, staff, school board and other educational personnel across the state.

We realize that reviewing this plan may not address every question you have. We recognize some concepts and actions may be polarizing, and there are strong opinions about what the school should do or should not. But we must remain open to what is possible and consider all options so we can move forward.

Thank you for your time reviewing this plan. We encourage everyone to ask questions and communicate their concerns as we move forward. Together, our school can provide quality education to our children in a safe manner, if we work together to solve problems.

Respectfully,

Mr. Jeff Simmons, Superintendent

Pam Kukla, School Board President

Basic Health and Safety Guidance for School, Home and Out in Public

The district strives to provide a healthy and safe environment for all who occupy our school. The following guidelines are intended to provide a framework for the district's response to COVID-19.

Best Intentions

Despite taking every reasonable precaution, there is not a guarantee that our school will be without risk as it relates to COVID-19. The virus will be present on our buses and in our classrooms. In certain situations, social distancing is not possible in a school setting. Our actions, as outlined in this plan, will not prevent any student or staff member from being in contact with the virus.

- Protect Yourself and Others
- Wash your hands often with soap and water for at least 20 seconds especially after blowing your nose, coughing, or sneezing
- Avoid touching your eyes, nose, and mouth
- Students are encouraged to wash their hands often throughout the day at school as well as home
- Avoid close contact
- Keep social distance from others
- Sharing of items & materials should be limited as much as possible
- Cover coughs and sneezes with a tissue or use the inside of your elbow
- Throw tissues away and wash hands or use hand sanitizer to prevent spread

Who Determines the Color of our State?

- The Governor in consultation with the North Dakota Department of Health (NDDOH) will make the determination if and when the state or a specific county may change colors.

Who determines the Color of our School District?

The determination will be local control and ultimately the decision of the school board. The decision will be based on cases in school and guidance from state and local health officials.

How do I know the Color of my County?

- North Dakota's K12 Smart Restart will follow what is identified at the state level. If the state adjusts from a statewide color to a county color, communication will occur among the NDDOH, NDDPI, and the Governor's Office and Local Public Health will be informed. The NDDOH in coordination with Local Public Health will provide updated information to school districts if this occurs.

May our District choose to implement more Stringent Health & Safety Protocols?

- Absolutely. School districts may choose to implement specific mitigation protocols that are more stringent than what is included in the current color risk level.

How do we handle a Positive Test Result?

- Every school district **must follow** the protocol provided by the NDDOH in response to a positive test result with a staff or student.

How do we handle a Close Contact?

- Every school district **must follow** the protocol provided by the NDDOH in response to a close contact.

Health Check: To accomplish our goal of reopening our schools and keeping them open, it will be important for students, staff, parents, and patrons to do their part by following health guidance and monitor their health.

The CDC does not recommend universal symptom screenings be conducted by schools. Parents/caregivers should monitor their children for signs of infectious illness every day. A decision tree is available for use by parents.

https://www.health.nd.gov/sites/www/files/documents/Files/MSS/coronavirus/NDDoH_COVID-19_Parents_Decision_Tree.pdf

- In addition to general infectious disease exclusion criteria, schools should exclude ill children who meet the following criteria: Fever (100.4oF or higher)/feeling feverish, sore throat, new/worsening uncontrolled cough, difficulty breathing, vomiting, diarrhea, abdominal pain, loss of taste and/or smell
- OR two or more of the following symptoms with new or worsening onset: fatigue, severe headache, muscle/body aches, chills, congestion/runny nose.
- Children should stay home for 24 hours with no fever (without the use of medication) and improvement of symptoms – whichever is longer.

Close Contact: is defined as someone who was within 6 feet of an infected person for at least 15 minutes starting from 2 days before illness onset (or, for asymptomatic patients, 2 days prior to positive specimen collection) until the time the patient is isolated.

https://www.health.nd.gov/sites/www/files/documents/Files/MSS/coronavirus/School%20Resources/Close_Contacts_in_School_Child_Care_Settings.pdf

- Children or staff who are identified as close contacts to a confirmed case of COVID-19 must be excluded from the school (quarantine) until 14 calendar days after their last known exposure to the case.
- In a school setting, close contacts to a case are often friends, teammates, classmates sitting next to, in front of, or behind the case, and potentially children in the same room as a case.

- This may mean that certain classrooms in a school have to be closed for 14 calendar days. If a case occurs in staff or children who are in multiple classrooms, then this may mean a higher number of close contacts have to be excluded from school for 14 calendar days.
- Even if a close contact tests negative during their 14-day quarantine period, the contact must complete the 14-day quarantine period. It can take up to 14 days to develop COVID-19. If a parent or other household member tests positive, the child may need to stay out of school for the case's isolation period (10 calendar days from onset) plus the child's quarantine period (14 calendar days).
- If a parent is a contact to someone confirmed to be positive for COVID-19 (case), then the child may still attend school if the child did not have direct contact to a case.

Responding to a Confirmed Case of COVID-19: An important part of limiting the spread of COVID-19 in our community is identifying those who may be sick, infected or who have been exposed.

- The confirmed case of COVID-19 must be excluded (isolation period) from school for ten days after onset of symptoms (if no symptoms, then exclusion is ten days after collection date of test) and be fever free for 24 hours (without the use of fever reducing medications) and have improvement of symptoms, whichever is longer.

Students/Family

- If your child has tested positive for COVID-19 we ask that:
 - You do not send your child to school
 - Notify the school of the positive test
 - Follow guidance from your health provider regarding isolation and contact tracing

School District

- School personnel will alert Administration and District COVID Coordinator
- The NDDoH will provide guidance to the school and the case or case's parents/guardians.

- District will coordinate efforts to communicate to staff, students, and parents the possible exposure to COVID-19 while maintaining confidentiality as required by the Family Education Rights and Privacy Act (FERPA), Health Insurance Portability and Accountability Act (HIPAA), and the Americans with Disabilities Act (ADA).

https://www.health.nd.gov/sites/www/files/documents/Files/MSS/coronavirus/School%20Resources/NDDoH_COVID-19_Recommendations_for_Schools.pdf

Criteria Risk Indicators

If 4% of the school population is either COVID positive or considered close contact, the school will move from green (low risk) to yellow (moderate risk) at the discretion of the administration.

If 10% of the school population is either COVID positive or considered close contact, the school will move from yellow (moderate risk) to risk (high risk) at the discretion of the administration.

If a class has a greater than 50% of student who are either COVID positive or considered close contact, the entire class will quarantine for 14 days.

Phase I – Critical/High Risk School Closed	Phase II – Moderate Risk School Open	Phase III – Low Risk/New Normal School Open
Greater than 10% of the population is either COVID positive or close contact	10% of the population is either COVID positive or close contact	4% or less is considered positive or close contact

School-Based Operation Status

Phase I (Critical/High Risk)	Phase II Moderate Risk	Phase III Low Risk/New Normal
<ul style="list-style-type: none"> • Full School Closure • Classrooms 	<ul style="list-style-type: none"> • Individual classrooms may be closed 	<ul style="list-style-type: none"> • Schools Open (Face-to-Face with all students)

<ul style="list-style-type: none"> • School • District Office • 14-day quarantine • After quarantine period, re-evaluate on return to Phase 	<ul style="list-style-type: none"> • Alternative schedules will be implemented as necessary <ul style="list-style-type: none"> • Schedules and protocols to reduce class sizes, minimize numbers of students in hallways, etc.
